Re: Contract No. SP-1913

Attention: [REDACTED]

Dear Sirs:

This letter will confirm the verbal authorization previously given to you to proceed with the design, manufacture and delivery of four E-301 Hatches, drawing attached thereto. It is estimated that the cost of each four Hatches will be approximately \$81,000. Charges are to be made against Contract No. SP-1913. In addition to the above hatches, design, manufacture and delivery of the following auxiliary equipment is authorized hereby.

- a. Particulate Sampler - A B-159 piece of equipment consisting of a black box to act as a control for the detector unit. Estimated cost of \$10,000 for four units.
- b. Gaseous Sampler - An installation arrangement consisting of two compressors and two large storage bottles to fit into the equipment bay in such manner that particulate and gaseous samples can be taken from the same source. Lockheed to construct the platform and to make the installation. Customer to furnish the compressors, bottles and individual items required. Two complete installations are desired rather than four as for the particulate sampler. Estimate of cost to be submitted.
- c. Indicator to inform the operator (red light on dashboard or by other instrument) when to open the activating valve on the sampling equipment. Estimate of cost to be submitted.

It is assumed that the tracker can be left in the equipment bay so that path traversed can be recorded while sampler operations are going on.

It is requested that this office be kept informed of progress being made and of technical problem encountered. This office will furnish technical personnel to consult with and to assist the Contractor in the design of the equipment.
